LECHUZA®

Self-Watering Planters

Simplicity and quality is our philosophy when it comes to materials and working with our planters. But, this means much more to us when it comes to you, our partners and customers, because we want to make caring for plants in LECHUZA as simple and convenient as possible with a selection of practical planters and functional accessories.

The proven LECHUZA sub-irrigation system ensures that your plants always receive the right amount of water needed for magnificent plant growth. Enjoy your plants without the constant watering.

LECHUZA Premium Collection – recommended for interior landscaping

The unique advantages of LECHUZA planters

- **Better plant growth** thanks to a balanced supply of water to the roots.
- **Less watering** – Plants receive the water they need from the water reservoir.
- **Changing plantings is easy.** The removable plant liners can be exchanged on the spot and easily moved for space-saving winter storage.
- **Mobile even when planted** – coasters make moving even large planters child's play.
- **Quality** – made in Germany under the highest production standards.

CUBICO ALTO.

The art of decorating with tall planters

CUBICO ALTO // Sansevieria laurentii

CUBICO ALTO.

Elegant interior landscaping at eye level

The task of professional interior landscapers is to use plants to provide accents to a room's decor. This is the strength of CUBICO Alto. With its small base and elegant height, it fits almost anywhere in commercial buildings where remaining true to size in a limited space matters.

The unique advantages of CUBICO Alto

- Uses the same planter liner as the CUBICO 40 – Pot your plant only once and then choose to put the liner in either the CUBICO 40 or CUBICO Alto
- Stable and sturdy
- Gradually tapers from top to bottom – only 16 × 16 inch with a height of 41 inch

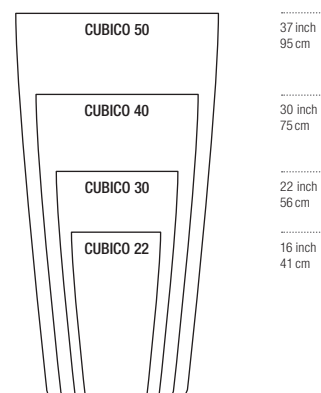

CUBICO 30 // Sansevieria laurentii

CUBICO

CUBICO 50 // Spathiphyllum 'Sensation'

CUBICO.

Proven classic design

CUBICO combines elegance and attractiveness with the most convenient use and care. The wide range of sizes, colors, and accessories makes CUBICO perfect for any space, and with the CUBICO coaster, the planter is mobile even when planted.

The unique advantages of CUBICO

- Available in sizes with a height of 7 to 37 inches (18 to 95 cm) and in six different colors
- Plant liner and sub-irrigation system included
- Coasters available for CUBICO 30 and 40

DIAMANTE 40 // Ficus lyrata

DIAMANTE.

Multifaceted surface brightens spaces

DIAMANTE's unique surface structure, featuring a high-gloss finish, reveals the planter's multifaceted personality from every angle. DIAMANTE's diversity and expressiveness make it ideal for both tall and exotic plants, and arranged in an ensemble, it can bring even austere surroundings to life.

The unique advantages

- The interchangeable plant liner fits in both DIAMANTE and RONDO 40 planters
- Available in four high-gloss colors

DELTA 40 // Ficus benjamina 'Exotica'

reddot design award
best of the best 2008

DELTA 40 // Sansevieria 'Jiboa'

Guarantees a beautiful
entrance hall to welcome guests

DELTA.

Outstanding design from every angle

LECHUZA DELTA unites advanced engineering and design. The LECHUZA sub-irrigation system and the innovative liner reliably care for your plants while tucked away in this planter's flowing, organic design.

The unique advantages of DELTA 30 and 40

- Interchangeable plant liner with sub-irrigation system
- Tall and narrow column planter
- Stable and sturdy

CLASSICO

NEW!

Available in all colors

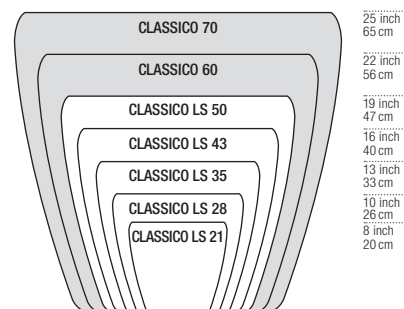

Starting in Spring 2013, CLASSICO planters sizes 21 to 50 (all colors) will be available with an integrated planter liner, which makes changing plants easier than ever.

The planter's color-coordinated frame handle slides back into the planter after use. This is not only convenient, but it also underscores the planter's superior design.

Available in all colors

QUADRO LS

Liner system or LS – available in every QUADRO All-in-One Set size 21 to 50, starting in Spring 2013.

QUADRO LS.

Sleek form with great function

The popular form of QUADRO is enhanced significantly starting in Spring 2013. The recessed frame handle is designed to match the color of the planter and comes with each All-in-One Set (sizes 21 to 50). This not only looks beautiful, but it also allows you an easy way of alternating the plants in your room.

The unique advantages of QUADRO LS

- Patented changeable plant liner*
- Recessed liner handles match the planter's color, making them not only useful but a compliment to the planter's overall design
- Optional add-on: coaster for QUADRO 43 und 50

* See the current price list for details about this offer

	charcoal metallic		black high-gloss

What makes planters from LECHUZA different? Everything.

LECHUZA planters are not just aesthetic. They are also beautiful on the inside.

Magnificent plant growth thanks to the sub-irrigation system –

LECHUZA simplifies plant care with its signature sub-irrigation system. Simply fill the water reservoir integrated into the bottom of the planter. Then, let LECHUZA tend to the plants for up to 12 weeks* without the need for additional watering.

No waterlogging – The original LECHUZA sub-irrigation system is suitable for plants with high water needs, as well as those that require significantly less water, such as succulents (cacti, yucca, etc.).

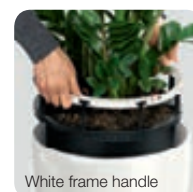

Clever accessories – Interchangeable plant liners, recessed frame handles, and coasters that virtually disappear under the planters further enhance each planter. As an expert and plant lover, the LECHUZA brand makes your daily life and work with plants as simple as possible. We are always working on new solutions in detail and find pleasure in making your work with plants even easier.

Patented: The LECHUZA plant liner

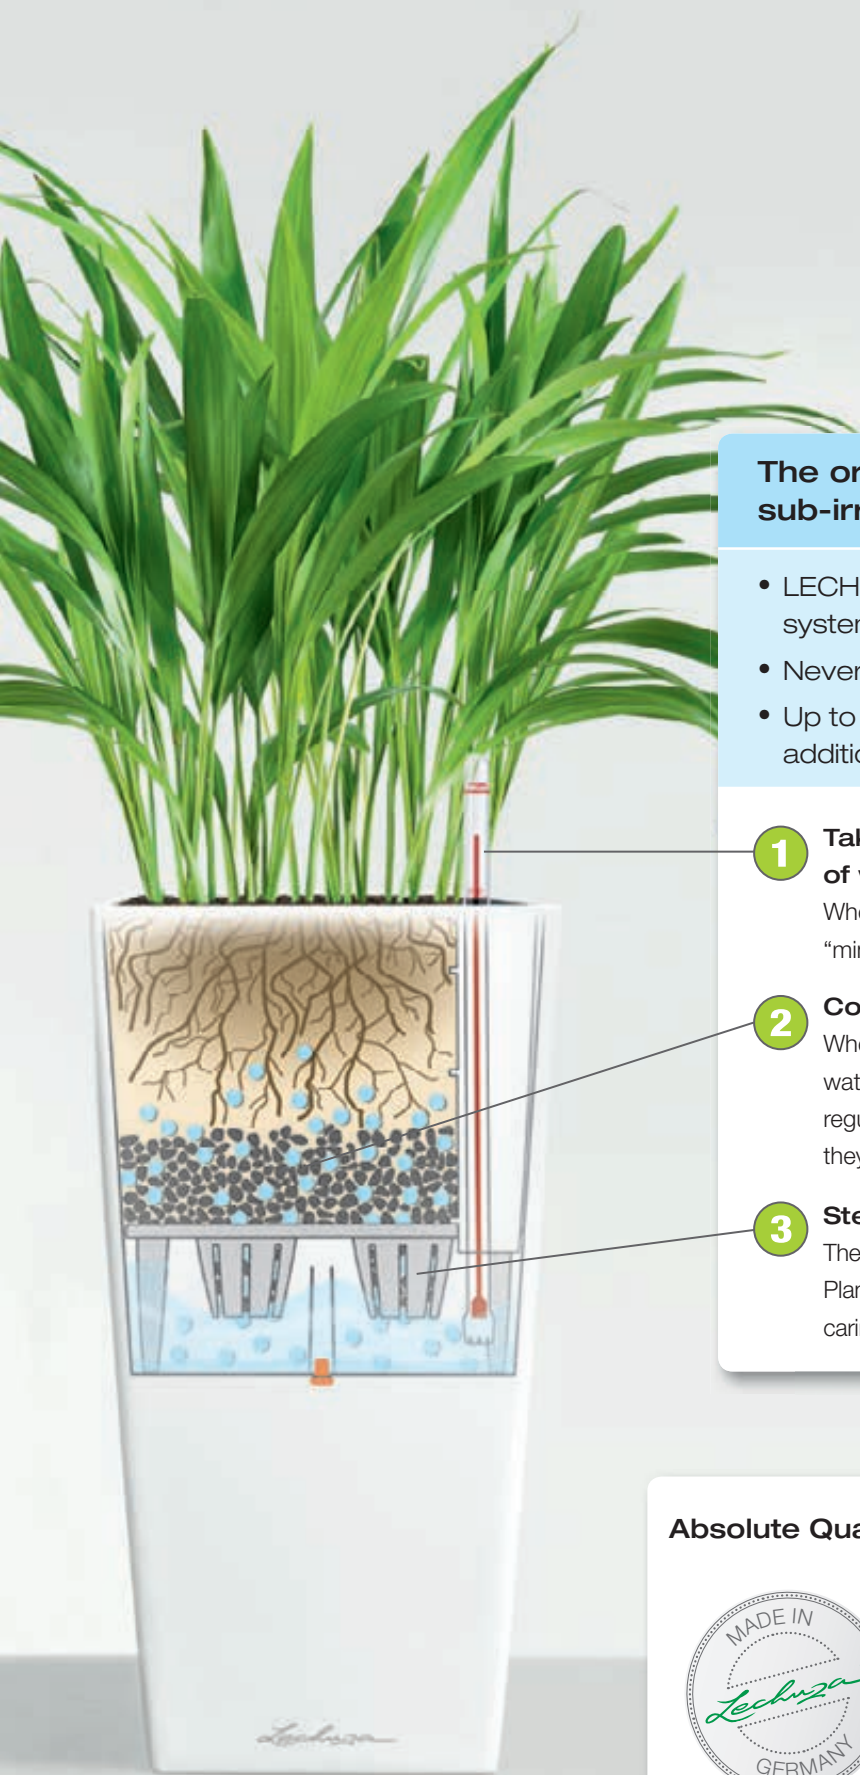

The stable LECHUZA plant liner facilitates changing the planting, as well as the transport of your plants.

Form with function: DIAMANTE, RONDO, and DELTA (and in Spring 2013, even CLASSICO LS and QUADRO LS) come equipped with not only plant liners but also recessed frame handles that match the planter's color.

White frame handle

* Depending on plants, planter size, and environment

The original LECHUZA sub-irrigation system

- LECHUZA's original sub-irrigation system makes plant care easy
- Never overwater your plants again
- Up to 12 weeks without additional watering*

1 Take the guess work out of watering

When the water level indicator reads "min.", refill the water reservoir.

2 Controls the water supply

Whether you have plants that need a lot of water or plants that need little, LECHUZA-PON regulates the water supply to the roots so that they receive the perfect amount of nutrients.

3 Steady watering

The water reservoir of LECHUZA's Self-Watering Planters allows for balanced water supply while caring for your plants to ensure optimum plant growth.

Absolute Quality – Made in Germany

LECHUZA planters are manufactured and finished in an environmentally-certified factory in Dietenhofen, Germany under the highest production standards.
